## HOW TO PRINT:

The PDF file is set up for easy printing on both 8.5 x 11 and A4 paper. Make sure you print at "actual size". For best results, set your printer to high/photo quality. Simple copy paper will do, but the black & white version would look nice on colored or softly textured paper.

## FOLDING INSTRUCTIONS:

Now that you've printed out your sheet, we need to turn it into a little book. Make sure you cut off any white border and start folding only the actual pages! Here's how:

1. place the print face down and fold the sheet in half lengthwise
2. open, then fold in half the other way
3. fold the open edge toward the middle crease, turn the paper around and repeat on the other side, so that you end up with 8 rectangles and a W-shaped sheet (3.1).
4. cut along the middle fold as shown in the image
5. pull the ends apart and down to create an X-shape (5.1)
6. wrap the cover and the back around the other pages to get a little booklet

Optional:

You can glue the open pages together if you like to make the book more sturdy

## MAKE SOMEONE SMILE

Your Poemfairy Book is ready to be sent on it's journey - may it travel far and brighten people's days!
